

What Leaders of the Chiropractic Profession Are Saying About Greens First Meal Replacement Kits!

Dr. Arlan Fuhr of Activator Methods International

*“About three years ago Dr. Don Hayes approached me about a new product called Greens First Meal Replacement Shake. As I investigated this, I decided that I was going to use it for myself. I put myself and wife on it and we found it to be an excellent breakfast replacement, since both of us are busy and we go in the morning very quickly. We noticed that our weight was maintaining, and we noticed that our regularity increased. **So, it was just something that was very good for ourselves personally.**”*

*Then we opened a new clinic last year and we thought we would test it here. We put it into the clinic and found the thing that we'd been looking for and that is simplicity! **Greens First Meal Replacement just simply has it all and has it all in one product. It has protein, which actually tastes good and it has greens which most people don't eat enough of. It was simple and it was easy and I can recommend it.** So, before you jump into complicated things for your clinic or complicated things for yourself, take a look at Greens First Meal Replacement.”*

Dr. Rob Jackson of Back Talk Systems

*“I met Dr. Don Hayes at a chiropractic convention where he was offering the Greens First Meal Replacement Shake and when I first looked at it, it made sense to me right away. After owning a nutrition company for over 5 years and realizing that offering hundreds of products wasn't what most doctors wanted to do, I was looking for a simple way to offer one nutritional product that would cover most of my patients' needs. Greens First Meal Replacement Shakes do it all by simply replacing breakfast every day. **Its been simple, its been easy, it only takes about 60 short seconds to get it communicated to patients and, because it uses a systematic approach, its all you'll need to offer nutrition in your practice. Why not add extra income to your practice by offering nutrition in a way you've never offered it before. It will benefit both your patients and your practice!**”*
